

1994 - 2014

P.S.S.T celebrates 20-year anniversary

Dear customers, business partners and friends,

Successfully for 20 years in a market with constant changes, ups and downs and innovation persevered P.S.S.T since the first day. In April 1994, Dr. Axel Wenzel established the company as a start -up in a small business room in the suburban area of Munich. In that time, we were still "nameless". P.S.S.T has grown since that time and the number of clients increased from year to year.

The corporate philosophy of P.S.S.T since the first hour is highest possible quality in services, good value for money and excellent counseling. Today P.S.S.T is a solidly positioned company with 5 employees, some freelancers and a huge line-up of professional cooperation partners in EU and beyond.

Managing Director of P.S.S.T explains: First of all, our employees and partners are of utmost importance for us! We owe them that we were able to establish ourselves over the years on the market and also maintain in stormy times. Given the current services we are offering, expertise in science and personal counseling is a big plus for business and research. It was a deliberate decision of the company to stay as SME and not to grow as fast and as much as possible. Thus, we are always able to keep direct contacts with our clients and to be a "one stop shop" for their regulatory and drug development needs for external support.

This is also reflected in the fact that there are still some of the original employees that are still on board and care still for clients that started to have confidence in our services and experience from the early beginning in the 1990ies.

In this way we want to thank you as our customers by heart for the given trust and constructive cooperation in the recent 20 years. It has been and it will be enjoyable to us in the future to work with and for you.

July 2014

Dr. Axel Wenzel, CEO
