

Strengths

- Specialization in the field of Metabolic Disorders
- Professional experience in Clinical Research and Regulatory Affairs
- Professional Medical Writing

Professional Summary

Our consultant is a Professor of Medicine at one of the leading institutions in Germany with a strong background in basic and clinical research, internal medicine and a focus on the clinical management of metabolic diseases (e.g. lipid disorders, diabetes, osteoporosis). He has more than 20 years of professional experience and his consulting experience covers project management and study design “from bench to bedside” as well as clinical and regulatory affairs. He was involved in various projects related to drug and therapeutic development as well as assessment and he has also served as an expert reviewer for several authorities.

After graduating medical school, he obtained extensive training as a physician in both, basic and clinical sciences at top universities in Europe and overseas. He has about 90 publications in his field and during his academic career he was awarded with several prizes. He’s officially certified as a “Clinical Scientist” (Prüfarzt) and as “Clinical Trial Manager” (Studienleiter). He received a degree in “Clinical Research and Regulatory Affairs” and obtained a M.Sc. in “Drug research and management” from the “Deutsche Universität für Weiterbildung (DUW) in Berlin”.
